PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of professional experience building scalable web and mobile applications using React.js, Node.js, Express.js, MongoDB, and Flutter. Experienced in responsive web applications, RESTful APIs, authentication and authorization, CRUD operations, database integration, and Flutter mobile applications connected to backend services. Hands-on with PHP, MySQL, Git/GitHub, CI/CD, GitHub Actions, AWS, Vercel, and Render.

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Redux, Responsive Design
Backend	Node.js, Express.js, REST APIs, PHP, JWT, Authentication, Authorization, CRUD
Mobile	Flutter, Dart, Android, Mobile UI, REST API Integration, GPS / Location Services
Database	MongoDB, MySQL
DevOps	Git, GitHub, GitHub Actions, CI/CD, AWS, Vercel, Render
Tools	Postman, VS Code, NPM, API Design, Debugging, Performance Optimization

PROFESSIONAL EXPERIENCE

Software Developer (MERN / Full Stack)

Tenderwoods Solutions Pvt. Ltd. | *July 2023 – September 2026*

- Developed full-stack applications using React.js, Node.js, Express.js, and MongoDB.
- Built reusable React components and responsive interfaces using JavaScript, Hooks, and REST API integration.
- Developed secure RESTful APIs with JWT authentication, authorization, CRUD operations, validation, and error handling.
- Developed and integrated Flutter mobile applications with Node.js backend services and REST APIs.
- Implemented CI/CD workflows using GitHub Actions and managed source code with Git/GitHub.
- Deployed frontend and backend applications using Vercel, Render, and AWS.

Application Engineer

L&T Electrical & Automation – Deepa Agencies | *December 2018 – June 2023*

- Developed PLC, HMI, and SCADA systems for industrial automation applications.
- Commissioned VFDs and servo drives and supported system integration.
- Performed troubleshooting, testing, commissioning, and field-level technical support.

SELECTED PROJECTS

Site Tracker – Employee Attendance, GPS & Overtime Management System: Flutter Android app with PHP/MySQL backend and web admin panel. Implemented employee punch-in/punch-out, GPS location capture, attendance tracking, site management, overtime management, and administrative monitoring.

RESTOFIX – Restaurant Management System: Restaurant management solution covering operational workflows and management features.

Stock Management App: Inventory and stock tracking application with product, purchase, sales, and reporting workflows.

Workshop Management App: Bike workshop application for customer details, complaints, changed parts, labour charges, totals, and image capture.

Feedback System: Digital feedback platform with customer feedback collection, authentication, dashboard, and reporting features.

Food Ordering App: Responsive food ordering application with menu, cart, and order-management workflows.

Income Expense Tracker: Web application for tracking income and expenses with authentication and password-reset functionality.

Dynamic & Static Websites: Responsive business and ecommerce-style websites built with modern frontend technologies.

Diploma in Electronics Engineering — GPTC, Vechoochira, Pathanamthitta | 2012–2015
